Rigby's Jig Dance Studio

Eleanor Robertson, owner of Rigby's Jig, has been dancing since the age of 3. She fell in love with ballroom dancing while she was a student at George Washington University. After graduating she began to teach ballroom dance and opened Rigby's Jig in 2003.

Each has its own advantages. Private lessons provide one-on-one instruction that will help you learn faster, refine your technique or prepare for a special event. Group lessons are a great way to pick up new dance moves, meet new people and have fun dancing.

Please check our website www.RigbysJig.com for a calendar of all our classes, parties and events.

Auction Items

We are honored to have Eleanor Robertson and the staff of Rigby's Jig working with us this year.

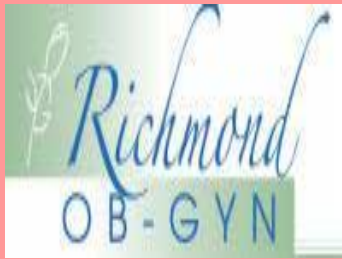

They have taken on the challenge of teaching our "Celebration of Life Dance Team" the dances that they will perform at the gala.

From now until the last week of August they will be taking group classes so feel free to take a class with them. Or watch the video progress on our website.

Rigby's Jig Dance Studio offers Ballroom, Swing, Latin, Country Western, and General Social dancing for everyone, beginner to advanced. The friendly dance instructors love to dance and love to teach dance, which is why we are the fastest growing dance studio in Richmond.

Rigby's Jig Dance Studio has just expanded into a bigger and more beautiful ballroom dance facility with various size dance floors for group lessons, private instruction or practice.

What are the signs and symptoms of breast cancer?

Early-stage breast cancer typically produces no symptoms when the tumor is small and most treatable. It is therefore very important for women to follow recommended guidelines for finding breast cancer at an early stage, before symptoms develop. When breast cancer has grown to a size that can be felt, the most common physical sign is a painless mass.⁴¹ Less common signs and symptoms include breast pain or heaviness and persistent changes to the breast, such as thickening, swelling, redness, and nipple abnormalities such as spontaneous discharge, erosion, inversion, or tenderness.⁴¹ A woman should have any persistent abnormality evaluated by her physician.
